**FEEDBACK ON CURRICULUM-STUDENTS
2023-24**

STUDENT FEEDBACK ANALYSIS ON CURRICULUM (2023-24)

For the academic year 2023-24, feedback about the syllabus was collected from the students. All this feedback was gathered using a five-point rating scale and analyzed using Excel software.

STUDENT FEEDBACK ANALYSIS ON CURRICULUM

The student feedback form consisted of questions designed to gauge their satisfaction levels regarding the curriculum. The following conclusions were drawn from the analysis of student feedback for the academic year 2023-24

- Curriculum Relevance and Updation: While most students considered the curriculum to be updated, some expressed the need for further updates.
- Understanding of Fundamentals: The majority agreed that the curriculum helps in internalizing the fundamentals of the subject.
- Critical thinking: The majority of respondents believe the curriculum leads to critical thinking. Very few respondents (around 2%) feel that the curriculum does not lead to critical thinking at all.
- Skill Enhancement: There was a noted demand for more skill enhancement courses to be integrated into the curriculum.
- Higher studies: The analysis shows that most respondents believe the curriculum imparts the skills and knowledge required for higher studies very well. A smaller percentage think it does so significantly or not at all.
- Employability: The analysis indicates that a significant portion of respondents believe the curriculum enhances employability in a specific field, while a small percentage think it does not enhance employability at all (< 5%).
- Use of ICT: Students agreed on the effective use of Information and Communication Technology (ICT) in the curriculum. Most of them stated that it enhances employability, although some pointed out the need to include more ICT components.
- Assessment and evaluation process: More than 75% of students agree that the assessment and evaluation process in the curriculum are fair and unbiased.
